

WHO WE ARE

The School of Applied Business Science (SABS) is the education and training arm of BSG International's 35-year consulting practice.

We teach business owners and their teams how to build quality infrastructure that survives growth, turnover, and market change — without pausing operations.

35+

years refining the methodology

200K+

hours of research & implementation

4

Fortune 500 test environments

7

phases of structured curriculum

THE 4 BARRIERS TO QUALITY®

1 • Fear of Expression

Ideas die in silence; problems hide until they're expensive.

2 • Poor Communication

Teams operate on assumptions instead of documented standards.

3 • Lack of Written Procedures

Knowledge lives in individual heads; expertise walks out the door.

4 • No Formal Training

Skills picked up by osmosis; performance is who you sat next to.

THE 7-PHASE CURRICULUM

Phase 1–2. Building Quality Business Infrastructure

Phase 3–4. Disciplined Execution & System Stabilization

Phase 5. Analytical Leadership & Measurable System Control

Phase 6–7. Leadership Integration & Sustainable Accountability

Phase 7 (ongoing). Intinuous Deployment — the living system

OUR APPROACH

MPSM — Manage, Plan, Schedule, Monitor — the shared discipline that makes process improvement repeatable. Training happens while the business runs.

Quantum-Based Business Infrastructure™ connects people, processes, and purpose into a living learning system.

WHERE SABS FITS

Growth Organizations — 15–30% annual growth scaling tomorrow.

Stagnant or Just-Starting — install the foundation from day one.

Continuance & Growth — 1–14% growth stuck at the next level.

The Entrepreneur — grow it right the first time.

“Modernizes what W. Edwards Deming began in the world of quality.”

— Performance Excellence team,
Raytheon
